# Exciting academic programmes

With programmes across the UK, USA, Canada and Australia, you'll have the time of your life!

## English language classes

Our English language classes are designed specifically for short-term language courses. With a maximum of 15 students per class, you will improve your English by focusing on speaking and listening.

## Culture Club

Our English classes will improve your speaking skills and increase interaction and classroom participation. And, with many of our students going on to further education courses that will be conducted in English, we also run a series of lively lectures as an alternative to some of the sports and arts options. These allow you to practice the listening skills you will need in an academic environment.

## Embassy ICT

Technology plays an increasingly important part in modern education. Many of our summer centres have classrooms equipped with data projectors, computers and, in some cases, interactive whiteboards. This enables us to use video, flipcharts and CD-ROMs in classes.

We also have a guardian system for our individual students in our junior centres. In addition, there are on-site first aiders and established links with local doctors, dentists and hospitals for any first aid issues that may arise.

For students aged 18 or over, or those travelling with a parent or guardian, we will provide information and directions to the centre.

## **Help during your stay**

On arrival at the centre, you will be welcomed by our staff and receive a full induction to enable you to settle in quickly and enjoy your stay with us.

All students are issued with an ID Card during their stay, for which you should bring a passport photograph. Students must keep the ID Card with them at all times, it contains not only the address of the centre, but important telephone numbers should you require assistance. Students with any enquiries or problems can speak to our staff at the centre, or contact our 24-hour emergency telephone service.

## Social Responsibility

As a global education provider Study Group seeks to make a difference by funding the construction of schools in disadvantaged communities. Through our charitable initiative Building Futures, Study Group works to identify those communities where the building of a school will contribute to the preservation of the social structure for future generations.

Study Group also recognises its responsibility towards protection of the environment and fosters among its staff, suppliers, customers, shareholders and local communities an understanding of environmental issues in the context of its business. Our collective task is to ensure that we continually improve the environmental impact of our global activities.
